Small Duct High Velocity Heating, Cooling and IAQ Systems

## Hi-Velocity Systems Case Study

Drilled Outlet Cooling Installed by Matt Getz of Climate Control

“Not Just a Heating System!”

The pictures demonstrate a “drilled outlet” installation for cooling, installed by Matt Getz of Climate Control and purchased through Southern Cal A/C Supply in EL Cajon, CA. Drilled outlets are unobtrusive and have been designed to fit in and match the space they are installed into, creating a much more visually appealing effect than other possible applications.

The unit is situated above a washroom in the rear of the store and delivers air conditioning evenly throughout the show room. It is also one of the many installations that utilizes R-410A Refrigerant.
